

Early Disease Diagnosis Project - Impact Infographic

Project Overview

Development of a cutting-edge diagnostic tool for early detection of Disease X. The project spanned 5 years and involved multiple phases including research, development, clinical trials, and market approval

Societal Impact

Environmental Research: Studies leading to a 15% reduction in local pollution levels.

Educational Outreach: 50 workshops for secondary schools, impacting 1,200 students.

Community Engagement: 30 public seminars attended by over 2,000 community members.

Community Engagement: 5 public seminars attended by over 2,000 stakeholders.

Project Outputs

Timeline

- Year 1:** Initial research and development
- Year 2:** Advanced development and initial testing
- Year 3:** IP Filing
- Year 4:** Public Dissemination
- Year 5:** Clinical trials and testing

Key Achievements

Product Development: Successfully created a non-invasive diagnostic tool with 97% accuracy.

Awards: Won 5 prestigious innovation awards in healthcare technology.

Collaborations: Established partnerships with 100 healthcare providers to integrate the diagnostic tool into routine screening.
