A step towards your future career

Free & Subsidised Courses

Springboard+ and Human Capital (HCI) Initiatives provide free and heavily subsidised courses to meet industry skills demands in key growth areas. These courses are free to applicants who are unemployed and homemakers and 90% funded to those in employment or recent Graduates.

Springboard+

Springboard+ is an upskilling initiative in Ireland that aims to address skills gaps and enhance the employability of individuals by providing them with relevant and industry-focused education and training. TU Dublin's Springboard+ courses are available to a wide range of individuals, including the unemployed, returners, formerly self-employed, the employed and recent graduates.

The courses are typically offered on a part-time basis for a maximum duration of 12 months, allowing individuals to continue with their existing commitments while upskilling themselves. The courses are designed in collaboration with industry partners, ensuring industry relevance and up-to-date knowledge. The flexibility of part-time study enables individuals to upskill or reskill while still managing existing responsibilities. It offers the flexibility to balance work, family, or personal commitments with education.

HCI Graduate Conversion Courses

TU Dublin offers postgraduate programmes, which are funded under the HCI (Human Capital Initiative). These courses are full-time and designed to meet priority skills needs. The Human Capital Initiative aims to increase capacity in higher education to provide skills-focused programmes designed to meet priority skills needs.

All courses provide job-readiness training and most offer the opportunity for work placement, project-based learning or industry site visits where appropriate.

To find out more about the Springboard+& HCI funded courses at TU Dublin, visit tudublin.ie/springboard. For eligibility criteria and detailed application and eligibility instructions, visit springboardcourses.ie. All applications must be made via the Springboard website.
